

NOTES FOR LEIWATER APPLICATIONS

1. Applications for leiwater must be submitted on or before 30 April 2019.
2. In spite of the fact that the Municipality will acknowledge every application for leiwater, the onus rests with the applicant to ensure that the Municipality has received the application. For the convenience of the applicants, a list of applications received will be placed on the notice board at the Municipal Office on 6 May 2019, for perusal and confirmation. Telephone enquiries may also be directed to Mr J Prins at 028-2549620. **Applications received after the due date will not be considered as the allocated time-slots cannot be changed.**
3. Times as allocated may not be cancelled or exchanged.
4. Erven, which do not require a leiwater turn for 2019/2020, will be closed off and sealed.
5. Leiwater must flow through a sluice from the Municipal channel. Sluices must be able to close properly. If the sluice does not close properly Council will effect repairs at the cost and for the account of the owner, or close off and seal the channel.
6. No person may extract water from the Municipal channel (even though it may run through their property) by pumping or in any other way impeding the flow at times other than the lawful hours allocated to them, as this may deprive other consumers of water during the times they are entitled thereto.
7. All obstructions must be removed, outside allocated hours, from the Municipal channel.
8. The owner, of a property through which a leiwater channel flows, must ensure that the channel is free of vegetation, trees and other obstructions.
9. Due to the numerous problems which have been experienced with the controlling of leiwater, drastic steps will be taken against transgressors and Council will impose fines upon unlawful users of leiwater, and their channels will be closed off and sealed.
10. With the co-operation and support of all concerned, and to the benefit of the village as a whole, this asset can be utilised and enjoyed by all users.

Thank you for your assistance and co-operation.
